Visionary software engineer and entrepreneur skilled in full-stack development, product innovation and digital strategy. Founder of **Rexpond** and **BiTech**, delivering scalable platforms and open-source tools. Experienced in leading hybrid teams across Nigeria, the UK and India, combining technical expertise with business leadership to create impactful products and attract investor confidence.

Experience

Rexpond
Founder & CEO 2025-Present

- Driving the vision, product roadmap, and partnerships for an AI inbox assistant designed to revolutionise digital communication.
- Overseeing end-to-end product development and investor engagement to scale the platform.

BiTech
Founder 2024-Present

- Built a digital solutions brand delivering websites, SaaS products, and a widely used library of free CSS templates.
- Directed multiple international freelance and contract projects, earning recognition for reliability and design quality.

Golden Goshen Educational Consultancy (GGECL)
Software Engineer 2024-Present

- Developed scalable websites and integrated APIs for the consultancy sector.
- Designed dashboards and optimised systems for performance and client experience.

Amadea Academy
Frontend Developer 2024-Present

- Built responsive, accessible interfaces for EdTech solutions.
- Collaborated with backend developers to deliver cross-platform digital services.

TNAS2025 (Government of Osun State, Nigeria)
Full-Stack Developer 2023-2024

- Delivered a governance transparency platform, including secure user authentication and a custom CMS.
- Ensured accessibility across mobile and desktop devices.
